2. The only medical examinations conducted in the 290th Gds. Rifle Regt. [redacted] were those given twice a year, in April and in October, when the entire unit had a chest X-ray. This was done at the regimental dispensary, located in the regimental area, by personnel [redacted] members of the regimental medical company. The dispensary was equipped to handle minor injuries and ailments. The medical staff consisted of one dentist, one doctor, and a number of medical corporals. There were no women assigned to this staff.
